COURSE INFORMATION

LOCATION: 84 US Hwy One
North Palm Beach, FL 33408
& On The Internet

1:00 P.M. **Making Sense of Elevator & Escalator Failures**
Lawrence Marley, Rimkus Consulting Group

This one-hour course is designed to help adjusters understand why Elevators & Escalators fail and accidents happen. The course will review Safety Codes for Elevators and Escalators and various types of lifts. Elevator case studies will review events from water leaks, entrapments, elevator stoppages, door closures, and more. Escalator cases will address shoe and clothing captures, trip and falls, stoppages, and step failures. The course will also discuss how states regulate lifts as well as provide tips on handling these claims and how to best work with elevator service providers.

Course ID: FL-105431; GA CLASS-55582; GA WEBINAR-55583; NC CLASS-209311; NC WEBINAR-209312; TX-113427; UT-36931; CA-372031; LA, NH, MN pending.

2:00 P.M. **Managing the Unmanageable Claim**
Jeff Vernis, Vernis & Bowling

Have you ever had a claim that you could not control? The Claimant's counsel will not accept your reasonable offer. There were more and more depositions being set and you felt that you were not in control of your claim. Some claims take a path different than other claims. Some are or become more difficult to manage and control. This session discusses strategies to effectively manage the difficult litigated claim. We will define the "unmanageable claim" and discuss the common reasons why they are or become "unmanageable". We will then discuss ways to get control of your claim and manage it through a successful conclusion.

Course ID: FL/GA/NC/TX/CA/LA/NH/UT pending.
