Motorists Insurance and Enservio Sign
Multi-Year Software Agreement

A multi-year contract for Enservio's contents management SaaS application for all contents claims needs

Needham, Mass. – January 12, 2016 – Enservio, Inc., a leading provider of contents claim management software, payments solutions, and inventory and valuation services for property insurers, today announced a multi-year agreement to provide The Motorists Insurance Group with ContentsExpress™, the leading self-service contents management solution, as well as onsite inventory and valuation services.

Available as a web-based, SaaS subscription, ContentsExpress is the industry's leading contents management solution trusted by hundreds of property insurance carriers nationwide.

"We've been fortunate to share a long and successful relationship with Motorists Insurance providing them with our best-in-class contents inventory and valuation services," said Rob Chase, Enservio Co-CEO & Chief Customer Officer. "ContentsExpress will further benefit Motorists giving their claims professionals the tools they need to easily and efficiently manage property contents leading to fast, accurate claim settlements and enhanced policyholder satisfaction."

"As a long-standing partner, Enservio shares our values to protect our policyholders' way of life. ContentsExpress will lead to a superior customer experience and satisfy our policyholders' high expectations for fast and accurate settlements," said Teresa King, Motorists Vice President & Chief Claims Officer.

ContentsExpress is a proprietary, cloud-based SaaS application that makes managing contents for property claims easy and highly efficient. Claim managers receive real-time actionable data on their claims program giving them the essential business intelligence needed to maximize their output and drive customer satisfaction. The solution's TrueLKQ™ product search engine and AutoLKQ™ match technology automatically provides like, kind and quality (LKQ) item matches from a contents database comprising 15 million products with pricing data updated daily. The combination of search and match technology improves efficiencies while streamlining the entire contents management process.
