Established: 1984

We are a Consulting Engineering Firm specializing in Forensic Engineering Services for the Insurance Industry and Legal Profession. Our firm was founded by forensic engineers who have been qualified as expert witnesses in courts across the United States and Canada for civil and criminal trials. Our firm has established a track record with major insurance companies and prominent legal counsel since 1984. We make every effort to be cost effective. We have no geographical limitations.

Services Rendered

Forensic Engineering, Accident Investigation, Accident Reconstruction, Air Bags, Pedestrians, Slip, Trip and Fall, Fire and Explosion Causation, Human Factors, Civil Engineering, Claims Investigations, Insurance Claims Support, Failure Analysis, Structural Failures, Experience Mod Projections, Building Code Experts, Paving Systems, Petrography (Microscopical) Examinations, Product and Package Testing, Structural Evaluation and Rehabilitation, Structural Monitoring and Instrumentation

Qualifications

Our forensic practice has included the preparation of over 600 written reports; preparation of over 60 affidavits in place of written reports when so requested, or in response to motions; testimony in over 90 discovery depositions; and testimony in over 75 trials. Our engineers have a combined 40 years of engineering experience including 17 years of engineering design, industrial operations and construction assistance; and 24 years of forensic engineering.

Memberships

Society of Automotive Engineers; National Fire Protection Association; National Association of Fire Investigators; American Institute of Chemical Engineers; American Society of Mechanical Engineers; American Society of Civil Engineers; Forensic Expert Witness Association

Service Area

Providing research and consultation services and expert testimony for the courts throughout the United States, Canada and the worldwide.
