The Value of A.M. Best Information:

A.M. Best Company collects data from the quarterly and annual financial statements of thousands of property/casualty and life/health insurance companies, HMOs, and alternative market entities. The data is subjected to a rigorous series of cross-checks and validation procedures to ensure its accuracy. A.M. Best uses this information, along with other supporting documents and interviews with company management, as the basis for its analysis of insurer financial strength and performance. Best's Ratings, Profitability, Leverage and Liquidity Ratios and Financial Size Category designations are among the unique, value-added indicators that result from A.M. Best's analysis and are published in many of our insurance industry references, reports and periodicals.
