

Best's Custom Data Services

In addition to our standard products, you can purchase customized data selections created to your specifications. A.M. Best houses the world's largest proprietary database of insurance industry information. Our analysts will work with you to determine the exact selection of information that meets your needs, in the format and medium that are best suited to your goals and your technical environment.

Custom projects are delivered as quickly as possible, based on the nature of the request. We also provide extensive customer support, not only in designing your custom project to your specifications, but also in helping you put the information to use.
